Reimagine your garden
with
Gro lounge

GRO LOUNGE IN THE GARDEN

Designed by Hans Thyge & Co., our Gro lounge chair and sofa are with their clean and stylish look not only available but also perfect for your outdoor environment. Offering unprecedented comfort to your garden, this brand new line is a game changer to any outdoor environment.

After leaving the Gro Lounge in the rain or snow, simply allow the stain-resistant and water-repellant fabric to dry out, or wipe the surface dry. As the water travels through the fibers and into the foam, the humidity is not able to come back up due to its membrane of solution dyed polyolefin. Thus, Gro will keep your seat dry and comfortable even through the harshest conditions.

SUMMER

WINTER

10 - FIESTA

08 - SHADOW

07 - WATERFALL

03 - LIMESTONE

05 - CHARCOAL

Offering our 10 year guarantee on all Kebe chairs does not have to be limited to our indoor furniture. Having tested the Gro range through harsh conditions for 2 winters and more than 18 months, we know Gro will survive many winters and summers outside. Built to last, adding powder coating rust protection to the metal legs and inside steel frame and springs, we are convinced of the longevity of our Kebe products. The Climbing fabric is Oeko-tex tested and fit for the task. Stain free, water repellent, anti- microbial and bacterial, mildew and odour resistant as well. And with a UV filter top grade of 5, it offers all the features you need and should expect of your new comfortable outdoor lounge.

Lightfastness [scale 1-8]:
ISO 105-B02 indoor: 8
ISO 105-B04 outdoor weathering: 8
UV test [scale 1-5]
