LUCCA MODULAR SOFA SYSTEM

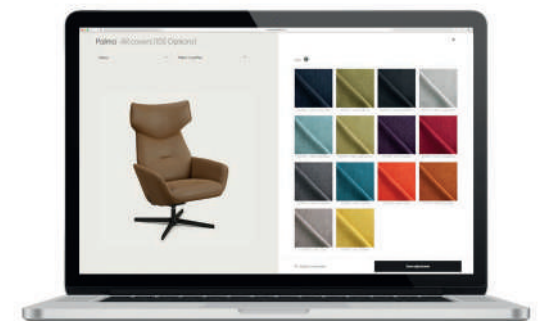

CUSTOMIZE YOUR IDEAL SOFA

- Various configurations available: create a small, medium, or a large sofa
- Wide selection of legs and armrests
- A wide range of fabrics and leather options to choose to personalize your sofa

WEBSHOP

- See your armchair in all available colors and fabric combinations available
- Choose accessories that easily coordinate, such as a footstool and a neck pillow
- Choose the base that suits you best
- Personalize and order online

NEW COLLECTION

KEBE DYNAMIC LIFESTYLE

Designed by Studio Schrofer

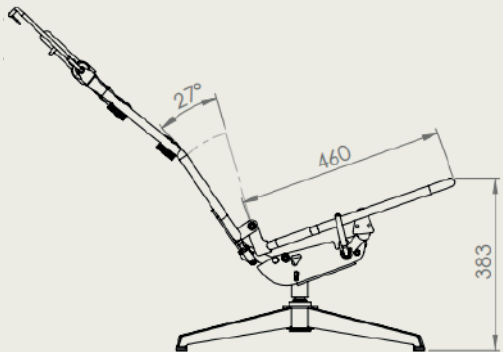

Real comfort that reflects
your movements

OPTIONAL: ADJUSTABLE
HEADREST

Dyfosit™ comfort

patented functional system

Our Dynamic Lifestyle collection is an innovative approach to comfort. We use a patented system with a unique glide path. As you recline you get a natural feeling of sinking into the chair as it tilts in sync with the back. Your body is perfectly balanced and it feels like you are in complete harmony with your chair.

Palma

no. 651
combi no. 648

With its genuine Nordic design and thanks to its unique technology, the Palma armchair perfectly combines comfort, functionality, and style. Coming from our Dynamic Lifestyle collection, this chair adapts to your every movement. You will drift while being rocked on the super-comfortable dynamic foam seat, while the swivel foot will accompany your movements gently. With its fine and elegant aesthetics and sleek shape, this armchair will beautifully enhance any interior.

- **CHAIR:** H 106 cm | SH 44 cm | W 77 cm | D 86 cm **FOOTSTOOL:** H 38,5 cm | W 60 cm | D 42 cm

KEBE RECLINER CHAIRS

1. Foam quality

The lifetime of the foam depends on the following two factors:

- A. Density of the seat cushion (54 kg/m³) and the back cushion (48 kg/m³). Please REMEMBER:
- a high density means a high quantity of foam that provides a long life of the chair
 - by using a high density it's sufficient with a 3-4 cm foam cushion on top of the springs in order to ensure optimum comfort.
- B. Elasticity of the foam. Please REMEMBER:
- Kebe uses molded high elastic cold cure foam, known as high elastic PUR foam.
 - The plastic fibers of this type of foam are very flexible, which means that the foam will always.
 - Remain elastic and stay in shape for years to come – it will never flatten..

2. Inside metal frame

The inside metal frame consists of a metal frame with no-sag springs. Please REMEMBER:

- the shape of the metal frame is ergonomic, following the shape of the body
- the combination of the shape of the metal frame and the moulded foam gives you an optimum comfort
- the metal frame is constructed to last for years
- the no-sag springs will never flatten – they will remain elastic as they are made of hardened steel.

3. 10 years warranty

A KEBE product is built on a solid and thoroughly tested construction that can stand many years of daily use. All new constructions are tested in testing machines before they are released. We offer a 10 years warranty on the foam stability (that it stays elastic) and on the inside metal frame.

Further, we refer to the Sale of Goods Act.

4. Outside frame

The outside frame is made of steel and the shape depends on the design of the specific model. The surface can be either chromed or covered with an epoxy painting and lacquered several times with a powder lacquer in order to make the surface knockproof. These two treatments of the surface are only intended for inside use.

5. Covers

The Kebe range is available in four different leather qualities: One soft quality, two semi-aniline qualities and one pure aniline quality.

Adore (ref. 256): 100% polyester, 88.000 Martindale, Lightfastness: 4/5.

Air (ref. 431)

Composition: 78%-100% recycled PET, 22% Polyester, Martindale: 95,000, Lightfastness: 4/5.

Balder (ref. 64) (ref. 64) is a slightly corrected semi-aniline leather with a soft touch. The hide is printed with a rustic structure which accentuates the character of the leather. Thickness: 1,3 – 1,5 mm..

Brema (ref 168): 39% polyester, 39% polyacrylic, 14% cotton and 8% wool. 25.000 Martindale. Lightfastness: 4/5.

Challenger (ref. 384)

Self: 100% Polyester, Martindale: 70,000, Lightfastness: 3/4.

Club Royal (ref. 73)

is an aniline-dyed leather coated with a thin finish in order to protect the colour. The leather is smooth, breathable, and absorbs humidity. Being a full-grain leather it has a natural surface. Thickness: 1,6 mm.

Earth (ref. 432)

Composition: 100% recycled PET, Martindale: >100,000, Lightfastness: 5.

Flannel (ref. 23)

Composition: 75% wool, 25% Polyacrylic, Martindale: 60,000, Lightfastness: 5.

Lido (ref. 37): 100% Polyester, 105.000 Martindale. Lightfastness: 5/6.

Reno (ref. 204) is a leather of exotic hides, chromium-tanned, lightly tanned with vegetable ingredients thereafter, dyed in the barrel and polished. The specific effect is achieved by finishing the leather with paraffin, oil, and aniline.

Soft leather (ref. 62) is a corrected grain where most scars and marks have been removed from the surface. The leather is easy to maintain due to a protecting layer of finish and is particularly suitable for families with children. Thickness: 0,9 – 1,1 mm.

Yeti (ref. 153): 100% polyester, 80.000 Martindale. Lightfastness 6.

Natural wrinkles: When the new furniture is taken into use the cover appears to be relatively tight as the leather and the inside wadding underneath the leather have not yet been used. Leather and wadding will be expanding relatively fast and natural wrinkles will appear on the leather. This will typically happen within the first months of use depending on how often the furniture is used. Hereafter the leather will only expand very little and will assume a more permanent form after approx. 6 months. The wrinkles are to be expected and they are a part of the charm that characterizes genuine leather.

6. Maintenance

A. Leather:

- Do not use chemical/synthetic detergents
- Avoid strong/hard rubbings on the leather
- Keep a distance of min. 30 cm from radiators and other sources of heat, protect against direct sunlight
- Wipe leather regularly, using only a soft duster
- Clean with a lukewarm soapy water, and a soft damp cloth Then wipe it off with a dry, soft cloth of wool. Do not wipe off with water!
- Stains of food, grease and liquids should be wiped off immediately.

B. Frame. Please REMEMBER:

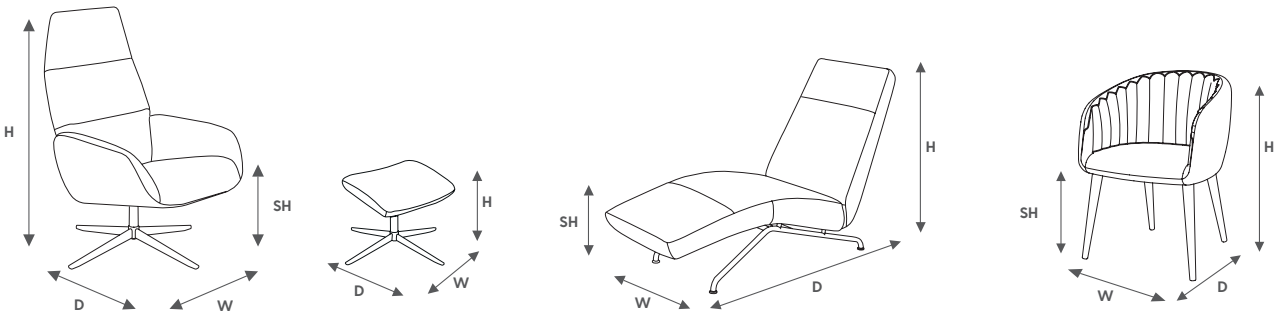

- to grease regularly the sliding tube underneath the chair with Vaseline in order to ensure an optimum sliding effect (it's preferable to use Vaseline as a lubricant because of its neutral color)
- that all parts can be replaced
- to tighten regularly the screws that keep the armrest and the back together

7. Country of origin / design

All our models are designed by KEBE, by professional designers with close relations to KEBE or in co-operation with our customers. KEBE products are characterized by a light and simple expression and are sold in more than 20 countries worldwide.
